

Coding Diversity into Technology

THE SOCIAL MEDIA CRAZY TRAIN

with Michael Knight

We are thrilled to announce our first ever livestream from our 7th Annual Leadership Development Summit, featuring Michael Knight's Coding Diversity into Technology. This year's Annual Leadership Development Summit, "Level Up", sold out in record time! To expand our reach, we are opening this special session on September 21st, 2023 from 8:30am PST to 10:00am PST to anyone who would like to attend virtually.

WE's mission is to support and advance gender parity in the electronics, industrial, and related industries which means addressing challenges that will impact the future of technology. Michael's presentation is designed to bring to light potential biases, that if not addressed, could be hardwired into AI technology. With his tenure as a respected leader and influencer in the electronics industry, Michael has historically been at the forefront of technology and continues to stay on the leading edge of innovation. He will present his findings, along with his analysis, and opinions on this topic of critical importance to all industries.

Please share this message with your colleagues and teams. This is a not-to-miss event!
