

Mentorship Program

The [Women in Electronics Mentorship Program](#) kicked off its 5th and largest ever group in March of this year. As a trusted guide for the women leaders of tomorrow, the mentoring process is key to developing both leadership and professional skills. During the first week of April, the Women in Electronics Mentorship Committee held the first of three Mentor and Mentee Cafes for this group which runs through the end of August.

The Mentor and Mentee Cafés are a great opportunity for those participating in the program to collaborate with their fellow counterparts regarding a variety of subjects relating to their goals, skill development, and professional growth. The Cafés are a way to enhance the mentorship experience and support mentors and mentees through their journey in the WE program.

All the Café discussions are continued in the WE CommUnity Mentor and Mentee Groups where both the mentors and mentees can share insights amongst themselves at any point in the program. WE look forward to the next round of cafes being held in late May.

Interested in becoming a Mentor or Mentee? Please [CLICK HERE](#) to fill out an application by July 30, 2023. The next cohort begins October 2023.
