## **Women in Electronics Announces the Expansion of its Annual Leadership Conference**

**Orange County, CA – April 3, 2023** – Women in Electronics (WE), an organization dedicated to opening opportunities for women and diverse talent in the electronics industry and related end-user markets, announced its Inaugural European Summit on April 20, 2023. The European Summit, "Level Up," will offer keynote sessions, industry expert panels, thought leadership roundtables, and leadership workshops to address topics intentionally curated for the European community.

The WE European Summit is the first ever of its kind in the area. Attendees will engage and unite with colleagues throughout the electronics industry and beyond for a unique development and networking opportunity. As a growing global organization, WE has expanded its annual conference from inception in the United States to the United Kingdom, offering the conference experience for members and stakeholders in the European market.

To best understand the community's specific needs, WE is hosting an Executive Circle, which comprises local electronics industry leaders representing distributors, manufacturers, and OEMs, before the summit to strategize the implementation of the WE mission and goals in Europe. The Executive Circle takeaways will be applied directly to the thought leadership roundtable discussions at the summit.

The Annual Leadership Conference in San Diego, CA, will be held September 19-21, 2023, continuing the "Level Up" theme with focused sessions encouraging attendees to take ownership of their careers and advance to the next level. The sessions are designed to provide the development tools, strategies, and resources needed to excel exponentially. The content is valuable for seasoned leaders and professionals who aspire to advance their career journeys.

### **About Women in Electronics**

Women in Electronics (WE) was founded in 2017 by a group of industry professionals to offer a sense of community, develop together, and unite with colleagues to advance results in gender parity in the electronics industry and related end-user markets. WE is focused on four organizational goals: empower, advocate, develop, and celebrate by providing leadership growth and development, mentorship, networking, thought-leadership events, and career resources. Women in Electronics receives support from leading industry organizations and reaches the industry community through events and local chapters throughout the US and Europe, with plans to reach a broader global community.
